

### In search of yield and visibility

The low interest environment makes it challenging for investors to allocate the bond portion of their portfolio. For those willing to accept the risk inherent to corporate bonds (Investment Grade and non Investment Grade) on an investment time-horizon ending on the 31st December 2021, the fund targets attractive yields.

### Fund Strategy

- Investment universe comprises bonds with principal repayment around 31 December 2021 (Fixed-term maturity fund).
- Corporate bonds from various credit ratings.
- Rely first and foremost on an extensive fundamental analysis of each corporate bond.
- Active monitoring and management.
- Favours issuers offering good visibility for a given credit rating / preference for less cyclical sectors.
- No investment in financial sector.

### Back to the basics of finance

- Our teams do not bet on macro-economic events, do not speculate on currencies, do not try to generate short-term gain out of prices fluctuations, do not use credit derivatives nor structured products.
- Our teams focus all their efforts on analyzing the strategy and the business model of each company. We study their strengths and their weaknesses. We try to forecast the market evolutions and the revenues of issuers according to their competitive environment, their market growth, the quality of their products and their cost structure. We also study balance sheets, assets quality, legal protections offered to the lenders, expected support from shareholders.
- In this way we participate in the financing and growth of companies in different sectors.

### Anaxis, pioneer and leader in fixed-term maturity funds

- History of 15+ years of performing and resilient investment solutions.
- 8 people team dedicated to corporate bonds.
- Pioneer in fixed-maturity funds and firm believer in the advantages of these funds:
  - Diversification
  - Thorough credit analysis of each bond
  - Visibility as credit and rate risks decrease over time
