Back to the basics of finance

- Our teams do not bet on macro-economic events, do not speculate on currencies, do not try to generate short-term gain out of prices fluctuations, do not use credit derivatives nor structured products.
- Our teams focus all their efforts on analyzing the strategy and the business model of each company. We study their strengths and their weaknesses. We try to forecast the market evolutions and the revenues of issuers according to their competitive environment, their market growth, the quality of their products and their cost structure. We also study balance sheets, assets quality, legal protections offered to the lenders, expected support from shareholders.
- In this way we participate in the financing and growth of companies in different sectors.
