

Seeking yield in a challenging market environment

In a world of very low interest rate and expensive stock markets, Diversified Bond Opp. 2025 offers attractive yields opportunities for investors willing to accept the risk inherent in corporate bonds over a horizon ending on 31 December 2025.

Fund Strategy

- Investment universe comprises bonds with principal repayment around 31 December 2025 (Fixed-term maturity fund).
- Corporate bonds from various credit ratings.
- Rely first and foremost on an extensive fundamental analysis of each corporate bond.
- Active monitoring and management.
- A strong sustainability policy to reduce risk and for ethical reasons.
- Favours issuers offering good visibility for a given credit rating / preference for less cyclical sectors.
- No investment in financial sector.

Back to the basics of finance

- Our teams do not bet on macro-economic events, do not speculate on currencies, do not try to generate short-term gain out of prices fluctuations, do not use credit derivatives nor structured products.
- Our teams focus all their efforts on analyzing the strategy and the business model of each company. We study their strengths and their weaknesses. We try to forecast the market evolutions and the revenues of issuers according to their competitive environment, their market growth, the quality of their products and their cost structure. We also study balance sheets, assets quality, legal protections offered to the lenders, expected support from shareholders.
- In this way we participate in the financing and growth of companies in different sectors.
